Produktbeispiele

Die Sicherheitsfolien aus Non Transfer Material bietet eine zuverlässige, manipulationssichere Lösung zur Schutzkennzeichnung Ihrer Produkte.

Das Trägermaterial besteht aus beschichtetem Silikonpapier (100 g/m²), das eine stabile und langlebige Basis garantiert.

Die Oberfläche aus mattem Polyester mit einer Dicke von 0,045 mm sorgt für Flexibilität und Widerstandsfähigkeit unter verschiedenen Einsatzbedingungen.

Die Folie ist temperaturbeständig von -20°C bis 60°C und garantiert in diesem Bereich eine zuverlässige Funktion.

Beim Versuch, die Folie zu entfernen, erscheint der Schriftzug "Void Open" im Etikett, ohne Rückstände auf dem Untergrund zu hinterlassen – eine effektive Methode, um unbefugtes Öffnen und Manipulationen zu verhindern.

Zudem ermöglicht die nachträgliche Bedruckbarkeit mit unseren Harz-Farbbändern im Thermotransferdruck eine individuelle Gestaltung. So können Barcodes, Nummerierungen, Warnhinweise oder andere Kennzeichnungselemente problemlos integriert werden.

Produktbeispiele blau Void total Transfer

Die Sicherheitsfolien aus total Transfer Material bietet eine zuverlässige, manipulationssichere Lösung zur Schutzkennzeichnung Ihrer Produkte.

Das Trägermaterial besteht aus beschichtetem Silikonpapier (100 g/m²), das eine stabile und langlebige Basis garantiert.

Die Oberfläche aus PET-Material mit einer Dicke von 0,070mm ~ 0.080mm sorgt für Flexibilität und Widerstandsfähigkeit unter verschiedenen Einsatzbedingungen.

Die Folie ist temperaturbeständig von -10°C bis 35°C und garantiert in diesem Bereich eine zuverlässige Funktion.

Beim Versuch, die Folie zu entfernen, erscheint der Schriftzug "Void Open" im Etikett, ebenso erscheint der Schriftzug auf dem Untergrund – eine effektive Methode, um unbefugtes Öffnen und Manipulationen zu verhindern.

Zudem ermöglicht die nachträgliche Bedruckbarkeit mit unseren Harz-Farbbändern im Thermotransferdruck eine individuelle Gestaltung. So können Barcodes, Nummerierungen, Warnhinweise oder andere Kennzeichnungselemente problemlos integriert werden.
